

DAY 02 Assignment

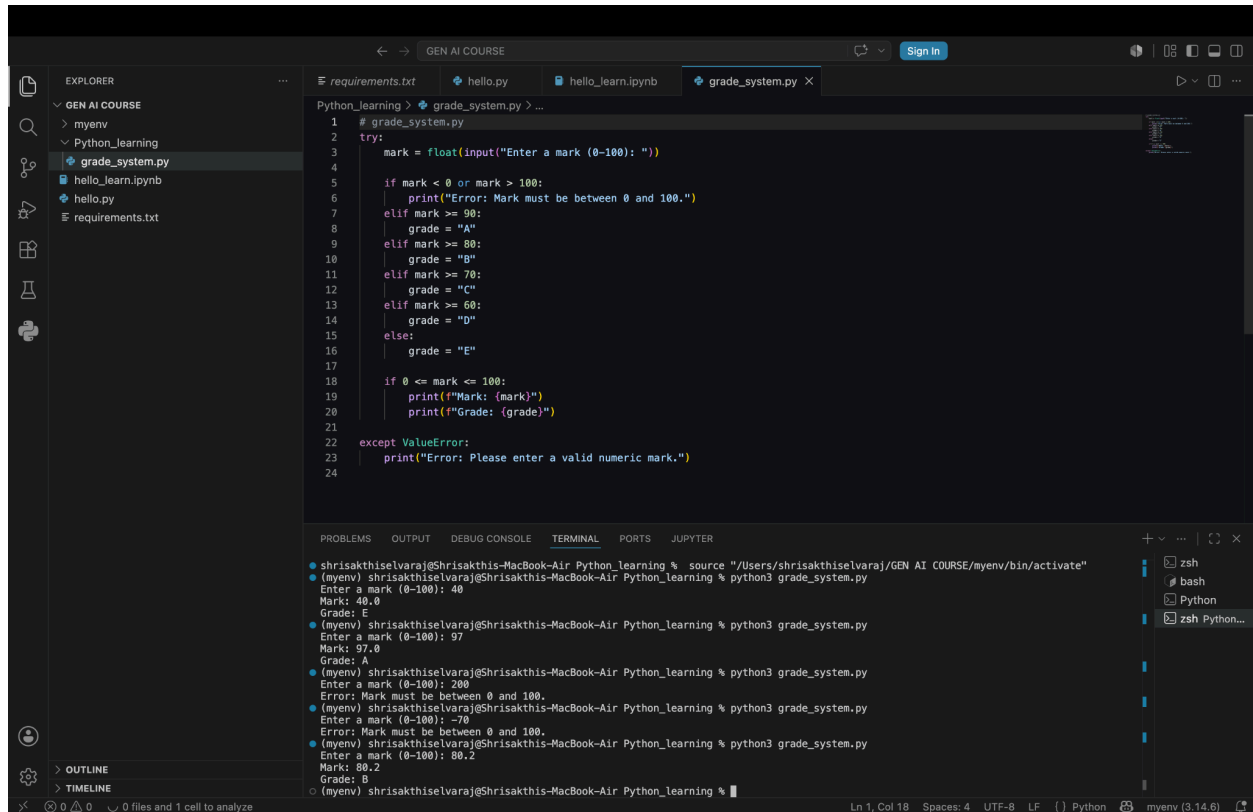

My learnings:

I learned how to use **if-else conditions** to make decisions in a Python program.

I learned how to **take input from the user** and use it in my code.

I learned how to **check if the entered mark is valid** (between 0 and 100).

I learned how to **handle mistakes in user input** (such as typing text instead of a number) without crashing the program.

The screenshot displays a Jupyter Notebook environment with a dark theme. The Explorer panel on the left shows the file structure: GEN AI COURSE, myenv, Python_learning, grade_system.py, hello_learn.ipynb, hello.py, and requirements.txt. The main editor area shows the code for grade_system.py, which uses if-else conditions to determine a grade based on a user input mark. The code includes error handling for invalid inputs (non-numeric or out of range). The bottom panel shows the terminal output, which demonstrates the program's behavior for various inputs: 40 (Grade: E), 97 (Grade: A), 200 (Error: Mark must be between 0 and 100), -70 (Error: Mark must be between 0 and 100), and 80.2 (Grade: B).

```
1 # grade_system.py
2 try:
3     mark = float(input("Enter a mark (0-100): "))
4
5     if mark < 0 or mark > 100:
6         print("Error: Mark must be between 0 and 100.")
7     elif mark >= 90:
8         grade = "A"
9     elif mark >= 80:
10        grade = "B"
11    elif mark >= 70:
12        grade = "C"
13    elif mark >= 60:
14        grade = "D"
15    else:
16        grade = "E"
17
18    if 0 <= mark <= 100:
19        print(f"Mark: {mark}")
20        print(f"Grade: {grade}")
21
22 except ValueError:
23     print("Error: Please enter a valid numeric mark.")
24
```

Terminal Output:

```
shrisakthiselvaraj@Shrisakthis-MacBook-Air Python_learning % source "/Users/shrisakthiselvaraj/GEN AI COURSE/myenv/bin/activate"
(myenv) shrisakthiselvaraj@Shrisakthis-MacBook-Air Python_learning % python3 grade_system.py
Enter a mark (0-100): 40
Mark: 40.0
Grade: E
(myenv) shrisakthiselvaraj@Shrisakthis-MacBook-Air Python_learning % python3 grade_system.py
Enter a mark (0-100): 97
Mark: 97.0
Grade: A
(myenv) shrisakthiselvaraj@Shrisakthis-MacBook-Air Python_learning % python3 grade_system.py
Enter a mark (0-100): 200
Error: Mark must be between 0 and 100.
(myenv) shrisakthiselvaraj@Shrisakthis-MacBook-Air Python_learning % python3 grade_system.py
Enter a mark (0-100): -70
Error: Mark must be between 0 and 100.
(myenv) shrisakthiselvaraj@Shrisakthis-MacBook-Air Python_learning % python3 grade_system.py
Enter a mark (0-100): 80.2
Mark: 80.2
Grade: B
(myenv) shrisakthiselvaraj@Shrisakthis-MacBook-Air Python_learning %
```
